Wed, 09 Jan 2019 17:08:00 GMT Multiplexed 4 digit 7 segment display mit Arduino ansteuern - A light-emitting diode (LED) is a semiconductor light source that emits light when current flows through it. When a current flows through the diode, electrons are able to recombine with electron holes within the device, releasing energy in the form of photons. This effect is called electroluminescence. The color of the light (corresponding to the energy of the photons) is determined by the ...
