Tecumseh XL Engine. The 4 bolts holding the engine on the frame, the gas line, and several wires that need to be unplugged, must be removed, the oil drained out, and the engine must be set on its flywheel side. The stacked pulley must be removed, if so equipped, the seal can be pried out with a sharp ice pick, and the new seal is tapped down...

PLANO POWER EQUIPMENT. Plano Power Equipment started out in 1962 as Plano Motor Mart in the old Inter-Urban railroad station on 15th Street, a block from old downtown Plano. After a few years, we expanded into a little two-door garage at one end of the building next door. The other end was occupied by a bicycle shop. Plano was a lot smaller then.

I keep GC in my two gen-sets, 5000 / 6250 Watt with Tecumseh 10 HP, and Generac inverter type 2000 watt. However I also keep two quarts of Mobil V Twin 20W50, and two quarts of Mobil 15W50 for hot days. There use to be an oil for air cooled engines that run on natural gas. I think RedLine made it, but I looked on their site and do not see it.
